

Indicateur de gouvernance: Corruption

$I_1$	$C_1$	Pop.
$\vdots$	$\vdots$	$P_1$
$I_n$	$C_n$	$P_n$

$\frac{I_1}{C_1} \times \frac{I_2}{C_2} \times \dots \times \frac{I_n}{C_n} \rightarrow Rel = G \text{ et } D.D.$

**General Representative Structure for Problematics?**

- ① How do you define essential concepts or specific phenomena in your analysis?  
 & DEFINITIONS
- ② What is the topology (classifications) pertinent to understanding the phenomena? CLASSIFICATION
- ③ What are the stylized facts and/or empirical observations regarding the phenomena? FAITS STYLISÉS
  - ↳ What are examples of the phenomena?
  - ↳ What are salient historical observations regarding phenomena?
- ④ What is/are the appropriate conceptual frameworks (models) for examining the phenomena? FRAMEWORK
  - ↳ What is the structure of the phenomena? structure
  - ↳ What are the causal relations between the phenomena? relations de causalités
  - ↳ What are the determining the diffusion (determinants) of the phenomena? déterminants de diffusion
  - ↳ How can the phenomena be modeled? modélisation
- ⑤ What are the objectives and behavior of economic agents concerned by the phenomena? AGENTS CONCERNÉS
- ⑥ What are the consequences of the phenomena and for whom? (Who benefits, who loses?) QUI GAGNE/PERD
- ⑦ What are possible policy and/or strategic responses to the problems identified in your analysis of the phenomena? MFP
  - ↳ Loi/STRATEGIE POUR REpondre AU PHENOMENE.

ABDI Institute 2013.  
 Robert F Owen  
 → numero. 425

→ de pouvoir et effet de masse  
 $PAB = \alpha + BOVEN + \epsilon$

Peut importe les lois, si bonne et juste soient-elles, il y aura toujours moyen de l'éviter (ex. les traffics illégaux).

↳ Ce qu'il faudrait c'est éduquer les gens pour qu'ils ne veulent plus faire partie de ça.

Research Projects

**Generic Structure of a Representative Research Problematic (subject to further revisions)**

Q1. What are the different dimensions of the particular phenomenon/a that is/are being treated in this research endeavor?

(NB: Make sure to provide a general definitional framework for the analysis.)

Q2. What are the stylized facts or observations that can be deduced regarding the phenomon/a being explained?

Q3. What is the appropriate conceptual framework for understanding the determinants of the phenomenon/a under consideration, as well as what are the associated performance implications?

Q4. What is the empirical evidence concerning and/or case study evidence regarding the particular phenomenon and what are associated insights?

Q5. What strategies, either public or corporate, have been adopted to respond the economic stakes related to the issues under consideration?

Q6. What is the critique that can be offered regarding the effectiveness of the associated policy initiatives?

Overall Grading Scheme:

↳ pop.; dégradation environnementale; corruption.

Phénomène → MFD.  
Gouvernance mondiale.  
D-D.

• Qui garde le gardien ?

⇒ la taille de la population peut-elle influencer les indices de gouvernance ?

↳ Si on est nombreux ds un pays est-ce que cela change notre pouvoir sur la

prise de décision TCEPA. ⇒ indice de gouvernance pondérée par la population
